EXPERIENCE

NICE SYSTEMS LTD.

Associate Software Engineer

Pune, India
January 2021– Present

- Developed and maintained both Frontend as well as Backend of an application which is used by approximately 80,000 call center agents.
- Worked on modifying UI for better user experience which helped the team to launch the product in countries having preferred communication language other than English.
- Delivered a release which consisted of storing a transcript in Salesforce Objects for all communication between the agent and customer.
- Helped in maintaining the existing APIs and worked on resolving critical production bugs which helped to maintain 99.99% uptime of the product.

AFOUR TECHNOLOGIES PVT LTD.

Software Development Intern

Pune, India
January 2020 – July 2020

- Worked with the team in developing Front End of Performance Review System using ReactJS.
- Developed a Kafka Service for streaming of data from one database to another.
- Designed Customizable Dashboards using Google Data Studio for better analysis as per client's requirement.

ACADEMIC PROJECT EXPERIENCE

HOTEL MANAGEMENT SYSTEM

- Developed a website as part of sponsored project which helped the hotel owner to manage orders and customers along with the hotel catalogue
- Enabled the customers to place an order and reserve table at the hotel remotely.
- Followed every phase of Software Development Life Cycle and deployed the project providing support for more than a year.
- Helped the hotel owner increase his productivity by nearly 80% and customers by 60%.

INFORMO

- Created an Android application which provided a single platform for all student clubs in college to publish their events and interact with the students.
- The application enabled students to book an entry for any event within few clicks irrespective of time and location
- Students were able to mark clubs as favorite to receive notification for any new event organized by the club.

VR BASED APPLICATION FOR HOME DECOR

- An application which helps users to choose between various home decor objects to decorate their home space.
- Helps users to place the objects at their desired location in the home space, change size of the object and move them accordingly in the space giving them feel of real time with help of VR Box.
- Provides user with detail cost quotation after user finishes the decorating his space.
